

# Cloud Solution Architecture

## Examples

Architecture	Examples	Pros	Cons
IaaS	<ul style="list-style-type: none"><li>- Amazon EC2</li><li>- Rackspace</li></ul>	<ul style="list-style-type: none"><li>- A lot more computing power available than on a PC</li><li>- Still a lot of control for a cloud solution</li></ul>	<ul style="list-style-type: none"><li>- A lot more work</li><li>- Usually higher latency</li></ul>
PaaS	<ul style="list-style-type: none"><li>- Heroku</li><li>- Wasabi</li></ul>	<ul style="list-style-type: none"><li>- Easiest way to host application</li><li>- Sometimes free depending on scale</li></ul>	<ul style="list-style-type: none"><li>- Usually very specific what kind of software can be hosted</li><li>- Provider can see code and data</li></ul>
SaaS	<ul style="list-style-type: none"><li>- GitHub</li><li>- Gmail</li></ul>	<ul style="list-style-type: none"><li>- No technical knowledge needed</li><li>- Fast and easy to use</li></ul>	<ul style="list-style-type: none"><li>- Blackbox</li><li>- More data collection, less privacy</li></ul>
